Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “I need easy and clear notes for my subjects.” • “I want practice questions to prepare for exams.” • “I need instant explanations for my doubts.”	THINKS • “How can I study effectively and score good marks?” • “Will this help me understand better and save time?” • “I need a personalized study plan based on my learning style.”
DOES • Attends classes and studies from textbooks and online sources. • Searches for notes, videos and practice questions on the internet. • Uses EduGenie to generate notes, quizzes and get instant doubt solutions.	FEELS • Often confused when topics are difficult to understand. • Stressed due to exams and lack of time. • Motivated and confident when getting clear explanations, organized notes and personalized support.
