

Project Executable Files

Date	28- SEP- 2026
Team ID	SWTID- 2026- 3665
Project Name	EduGenie – AI Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section documents the executable/deployable project files and access details for EduGenie.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt / dependency file	Yes
4	Database schema / seed files	NA
5	Environment configuration file (.env.example)	Yes
6	Deployed application URL	Yes
7	APK / Executable binary	NA
8	Dockerfile / Containerization config	NA
9	Test files and test results	Yes
10	Demo video / walkthrough	To be provided

Step 2: File / Folder Structure

Step 3: Deployment / Access Details

index.html- Front-endinterface		
Field style.css- Ulstyling	Details	
script.js- Front-endlogic		
Backend/APIApplication	https://edugenie-t3j2.onrender.com	
requirements.txt- Pythondependencies		
Login Credentials (Demo)	Not required / To be provided if authentication is enabled	
README.md- Setupandruninstructions		
Platform/Hosting Provider	Render	
docs/- Projectdocumentation		
Repository Link	https://github.com/bala712/EduGenie	
Demo Video Link	To be provided	

TheGitHubrepositoryanddeployedRenderURLhavebeenaddedtotheaccessdetails.

Step 4: Run Instructions

Step 5: Known Issues / Limitations

- Python installed
- Required dependencies available through requirements.txt
- Gemini/API key configured in the environment file

Step 1: Open the EduGenie project folder in VS Code.
Step 2: Create/activate a Python virtual environment if required. Step 3:
Install dependencies using pip install -r requirements.txt. Step 4:
Configure the required API key/environment values.

Step 5: Start the backend using the project's configured start command.

Step 6: Open the local URL in a browser and test EduGenie.

1 AI response time depends on the external Gemini/API service.

Workaround / Status

Ensure API access and a valid key are configured.

2 Missing or invalid environment/API configuration can prevent AI features.

Check for missing or invalid required values in the environment file.

3 External hosted service availability may vary.

Use the GitHub repository for source access and the Readme for the deployment URL.
